

ENVIRONMENTAL POLICY & TARGETS FY2017

INITIATIVES TOWARD CREATING A LOW-CARBON SOCIETY

Reduce of unit emission

- CO₂ ↓ 2%

Reduce of unit consumption

- electricity ↓ 1,5 %
- natural gas ↓ 8 %

Localization of production of incoming parts to MEAC

1. Optimization of operating ventilation by setting of adjustable operating calendar
2. Installation of energy saving lights in the warehouse
3. Increase the level of air recuperation in administration office
4. Increasing thermal insulation of the roof

INITIATIVES TOWARD CREATING A RECYCLING-BASED SOCIETY

Coefficient of landfilling kept

- < 0,5 %

Efficient utilization of the potential of waste such as material

1. Add the new waste bin to administration office
 - Plastic
 - Paper
2. Search for a company for recycling cans of beverages

STRENGTHENING OUR ENVIRONMENTAL AWARENESS

AND

BIODIVERSITY SUPPORT

Inform about MEAC contribution to reduce CO₂ emission from product usage

Compliance with legislative requirements

Improving EMS system

Planting new greenery in the MEAC area or in the public places

1. Visualization of energy saving thanks our high efficiency products (GX alternator)
2. Preparation for implementation of ISO 14001:2015 into the internal structure of environmental management
3. Locate suitable areas for greenery planting activities with the preference of public places
4. Continually check the legal requirements
